This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): Controls regarding least privilege and separation of duties should be implemented to ensure that only certain users are authorized to access sensitive information, ensuring greater compliance with PCI DSS and SOC standards. An IDS should be set up to mitigate the likelihood of a security breach occurring. However, in the event a security breach does occur, a disaster recovery plan should be established beforehand and backups of critical data should be kept in preparation for such a scenario. Increased security controls around the encryption of customer data would better ensure that Botium Toys is in compliance with E.U. GDPR standards. A password management system should be put in place to increase productivity and allow Botium Toys to better comply with PSCI DSS standards.
